

Mastering Ethereum: Building Smart Contracts and DApps

Ethereum is a decentralized blockchain platform that enables the creation of smart contracts and DApps. Smart contracts are self-executing contracts that reside on the blockchain, and DApps are decentralized applications that run on the Ethereum network. Ethereum is rapidly becoming one of the most popular platforms for building decentralized applications, and this book will teach you everything you need to know to get started.

Mastering Ethereum: Building Smart Contracts and DApps by Andreas M. Antonopoulos

What You'll Learn

In this book, you will learn:

- The basics of Ethereum, including its history, architecture, and consensus mechanism
- How to create smart contracts using Solidity, the official programming language of Ethereum

- How to build and deploy DApps using popular frameworks like Truffle and Web3.js
- Advanced concepts like tokenomics, decentralized finance (DeFi), and decentralized autonomous organizations (DAOs)

Who This Book Is For

This book is for anyone who wants to learn how to build decentralized applications on the Ethereum blockchain. Whether you're a beginner or an experienced developer, this book will teach you everything you need to know.

About the Author

Andreas M. Antonopoulos is a leading expert on blockchain technology and the author of several bestselling books on Bitcoin and Ethereum. He is a regular speaker at international conferences and has advised many Fortune 500 companies on blockchain strategy. Antonopoulos is a passionate advocate for the use of blockchain technology to create a more just and equitable world.
