```

**Additional SEO Tips for Images**

To further optimize the page for search engines and enhance the user experience, consider including images to complement the written content. Here are some tips for using images effectively:

- **Use descriptive filenames:** When saving your images, use descriptive filenames that include relevant keywords. For example, instead of "image1.jpg," use "the-light-in-hidden-places-book-cover.jpg."

- **Add alt text:** Alt text provides a written description of an image for users who cannot see it, such as those with visual impairments. Use concise, descriptive alt text that includes relevant keywords. For example: `<img src="the-light-in-hidden-places-book-cover.jpg" alt="Book cover for 'The Light In Hidden Places' featuring a young woman surrounded by shadows and light.">`

- **Optimize image size:** Ensure that your images are optimized for web use to reduce page load time. Use tools like TinyPNG or ImageOptim to compress images without compromising quality.
